

μ, σ from training set — stored in model checkpoint

raw features
 $\mathbf{x} \in \mathbb{R}^{n \times d}$

standardise

$$z = (x - \mu) / \sigma$$

clip

$$\hat{x} = \text{clip}(z, -5, +5)$$

$$EA/L = 8.2 \times 10^6$$

$$z = 1.73$$

$$\hat{x} = 1.73$$
